

1 · BUILD: FIVE SINGLE-PURPOSE AGENTS, EACH READS ONE FILE AND WRITES ONE FILE

Governed by **SYSTEM.md** · **CLAUDE.md** · **AGENTS.md** · Honesty rule: no invented clients or numbers; every **[REPLACE]** placeholder blocks a production build

2 · RUN: HOW A VISITOR BECOMES A LEAD

3 · PROJECT MAP

Repo map

- SYSTEM.md · CLAUDE.md · AGENTS.md
- Agent/ 5 agent definitions
- workspace/ research, brief, copy
- app/content/copy.json all text
- app/components/sections/ 14 files
- app/app/api/lead/route.ts API
- app/tests/ 52 Playwright tests
- app/supabase/migrations/ leads
- exports/ · presentation/ PDF, PNGs, deck

Quality gates

- Lint and TypeScript clean
- 52 tests at 375px and 1280px
- Build fails while [REPLACE] remains
- Tests blank database keys, never write real leads
- CSP, headers, 10 KB body cap, rate limit
- Test fails if copy.json and 03-copy.md drift
- Contrast 4.5:1 and 44px tap targets checked

Status

- Pipeline, copy and 13-section page built
- Lead API, Supabase table, QA fixes done
- PDF, PNG exports and 12-slide deck
- Fill 40 placeholders with real proof
- Live database test (host blocked here)
- Rotate the Supabase key
- Codex QA on your machine, then deploy

Stack and services

- Next.js · TypeScript · Tailwind v4 · Zod
- Playwright · ESLint
- GitHub: claude/ai-consulting-landing-page-j8kmgv
- Supabase: ar-datascienceminds-leads
- Codex CLI: installed, not signed in
- Vercel: planned, not deployed
